

Press Release MC

Northwest Missouri Cellular, Maryville and Midwest Data Center, Rock Port, recently announced plans to combine efforts and open an office in Mound City at 702 Main St. Northwest Missouri Cellular is a locally owned and operated wireless communications company serving Atchison, Holt, Nodaway, Worth and Gentry counties. Midwest Data Center is a wholly owned subsidiary of Rock Port Telephone, a cooperative that has been serving local customers for over 100 years. Midwest Data will be offering computer sales and service to the Mound City area residents.

“Laukemper Motors has done an outstanding job representing us in Mound City and will continue to be an agent for us”, said Roger Bundridge, manager of NWMC. “But we hope that offering an additional location in the area will expand our reach even further.”

Michael Goins, CTO of Midwest Data Center said “It’s a great fit for us. We want to offer Mound City residents a convenient, reliable source of computer repair and to be able to give customers local access to purchase new computers for home or business use. The combination of services has worked well in Rock Port and we want to offer the same opportunities in Mound City.”

According to Bundridge and Goins, the number one focus will be customer service. Glen Hockemeirer has been chosen to operate the Mound City location. Goins said “We think he will be a great fit for the community and we hope everyone will stop in and meet him.” Remodeling of the office space is almost complete and a grand opening is planned for mid May.
